Say Stop

Monday	Tuesday	Wednesday	Thursday	Friday
3 Trust.....But Verify	4 Look out for More Than the Job	5 There Is No Such Things as “Just for a Minute”	6 Never Assume the Operator Sees You	7 The Most Important Part of the Job Happens Before the Engine Starts
10 Hope Is Not a Rescue Plan	11 Smoke Is a Warning, Not an Inconvenience	12 The Right Call Can Prevent the Wrong Outcome	13 Don’t Wait Until Heat Wins	14 Every Lift Begins with an Inspection
17 One Last Look Can Make All the Difference	18 Electricity Always Finds a Path	19 Being Tied Off Isn’t Enough	20 When Something Doesn’t Feel Right, Stop and Evaluate	21 Watch Out for Each Other
24 The Hazard You Can’t See	25 Don’t Just Lock It....Verify It	26 Don’t Wait Until Somone Asks for Help	27 Know When to Stop	28 No PPE.....No Work
31 Don’t Assume the Inspection Was Done	Fall Protection Reminder Tie Off. Check Your Anchor. Stay Connected. Fall protection isn’t just wearing a harness. Before leaving the ground, verify your anchor point, inspect your equipment, and stay connected 100% of the time.
